Re: Status Report on Bay Area 2001 Ozone Attainment Plan

RECOMMENDED ACTION:

Receive and file.

DISCUSSION

The SIP Status Report provides the Board with a monthly update on the status of rule development activities and further study measures implementing the Bay Area 2001 Ozone Attainment Plan. Attached are an updated "SIP Rule Development Calendar," and, instead of the summary "SIP Further Study Calendar," more detailed status reports for the further study measures.

Public hearings are scheduled for Measures SS-12 (storage tanks – November 6th), SS-13 (surface preparation solvents – October 16th), and SS-14 (solvent cleaning – October 16th). With adoption of these rule amendments, all measures scheduled for adoption in 2002 will have been completed.

The scheduled completion date for further study technical assessment documents remains December 2002. Attached are detailed status reports for the further study measures. These reports provide the activity information normally provided in the further study calendar as well as additional information on background, completed activities, and planned activities for the measures.

Respectfully submitted,

Ellen Garvey  
Air Pollution Control Officer
